S3 Assembly - Today

There will be an S3 assembly this morning at 9am. Please go to your registration class to register and then make your way to the canteen.

[Mr Sweeney]

S1-6 Changes to entry doors

Changes were made to two of our external doors over half term, to enhance safety and security in our building.

The entry door by the janitors' office, leading into the glass corridor, no longer has a push pad opener nor external handles. Pupils may still enter via this door if they are able to gain access (e.g. someone opening from inside), but it will not be possible to open this door from the outside.

Additionally, the door known as the Crombie door (just before the Vardy wing) has been returned to its status as a fire exit, so external handles have been removed, meaning this door can no longer be used as an entrance.

Please note that these are not new changes to our agreed number of entrances, rather they are restoring these doors to their original purpose as well as their required level of security.

Thank you to everyone for your understanding in this.

S1-6 Water coolers

All the new water coolers are now fully-operational. We would recommend that pupils bring a refillable water bottle to use these, but please check the size first – bottles under 21cm will fit under the dispenser, taller bottles may have to be placed at an angle and may spill/break.

Please enjoy and look after this new resource.
